Downtown Lighting Upgrades to Cause Minor On-Street Parking, Traffic Signal, and Sidewalk Interruptions

BURLINGTON, NC-- Over the next several weeks, Duke Energy will be replacing street lights in downtown Burlington. Many of the lights have sustained damaged or are worn due to age.

During this upgrade, on-street parking and some traffic signal interruption may occur. Some sidewalk closures may also affect downtown pedestrian traffic. Clear signage will be used to direct pedestrian and vehicle traffic appropriately during the project.

The City urges pedestrians and drivers to use caution around work areas. Questions about the project may be directed to the City of Burlington Traffic Division at (336) 570-6156.
